#### 7001015 - BOSTIK WOOD MAX® TRANSPARENT POWER CARTRIDGE 320 G IT

# WOOD MAX TRANSPARENT POWER EXTRA STRONG, TRANSPARENT, WATERPROOF, FILLING SMP WOOD CONSTRUCTION ADHESIVE

# **PRODUCT DESCRIPTION**

Extremely strong, transparent, waterproof, di-isocyanate free and filling wood construction adhesive based on SMP-Polymer.

# FIELD OF APPLICATION

For waterproof (D4) (surface) transparent bonding of practically all types of wood as well as bonding practically all types of wood to many building materials, such as gypsum, (natural) stone, (cellular) concrete, metal, hard foam and various synthetics. Suitable for non-load bearing wooden structures using various wood joints such as mortise and tenon joints, dowels and springs. Suitable for interior and exterior applications, such as façade carpentry and sandwich panels. Very suitable for less-fitting joints (for example, unplaned wood). Ideal for both vertical and horizontal applications. D4: Interiors where flowing water or condensation are present over long periods on a regular basis. Exteriors exposed to the influences of the weather, providing effective protection for bonded wood.

Not suitable for PE (polyethylene), PP (polypropylene) and PTFE

### PROPERTIES

- Transparent
- Extremely high final bond strength (110 kg/cm<sup>2</sup>)
- · Waterproof (D4)
- · PU & Solvent free
- · Good filling capacity (up to 2 mm)
- · Can be scraped immediately
- · Permanently flexible
- · Paintable
- · All-weather resistant
- · UV resistant

- · Thixotropic
- · Good standing power; does not drip

#### **CERTIFICATES & STANDARDS**

#### Certificates

KOMO: Adhesives for non-bearing applications. Certificate 32394 based on BRL 2339 (EN 204: D4 Class, Watt '91).

### Standards

## PREPARATION

**Working Conditions:** The ambient temperature, the adhesive and the materials to be bonded should not be less than  $+5^{\circ}$ C. Wood humidity must preferably be between 10% and 18% (max. 25%).

**Surface Requirements:** Degrease oily types of wood with Griffon Cleaner. Roughen non-porous materials.

**Tools:** Sealant gun, fine-toothed adheisve spreader (1 mm), brush, roller, clamp.

# APPLICATION

#### **Directions for use:**

Apply the adhesive evenly directly from cartridge on both sides (for the best result) with a sealant gun. Where needed spread further with sealant gun, glue spreader, brush or roller. Ensure adequate layer thickness. Assemble joint within 30 minutes and fixate for at least 3 hours. No pressing. If clamped, use a limited pressure to avoid too much adhesive to be pushed out of the bond.

**Stains/residue:** Remove wet adhesive residue immediately. Dry adhesive residue can only be removed mechanically.

Our advice is based on extensive research and practical experience. However, in view of the large variety of materials and the conditions under which our products are applied, we assume no responsibility for the results obtained and/or any damage caused by the use of the product. Nevertheless, our Service Department is always at your disposal for any advice needed.

### **STORAGE CONDITIONS**

Store in properly sealed packaging in a dry place at between +5°C and +25°C.
