

GOMMA LIQUIDA AUTOAGGLOMERANTE

SELF-FUSING AND EXTREMELY STRONG REPAIR TAPE

PREPARATION

Preliminary surface treatment: It is not necessary to clean the substrate. However, contamination between layers must be prevented during winding.

APPLICATION

Stains/residue: The tape can simply be removed without leaving traces of adhesive behind.

STORAGE CONDITIONS

Properly sealed packages should be stored in a dry, cool, frost-proof location at temperatures between +5°C and +25°C.

PRODUCT DESCRIPTION

Self-fusing and extremely strong repair tape for 100% instant waterproof sealing, protection and repairs on all types of materials. The tape sticks to itself on contact and can be used anywhere: inside, outside or even under water!

FIELD OF APPLICATION

- Sealing: applicable for (watertight) sealing of electrical connections and insulating and protecting electrical plugs and cables.
- Protecting: also suitable for connecting objects to each other, combining materials, for protection against rust and as anti-slip for handles and tools, etc.
- Repairing: the tape is ideal for quick and easy sealing and repairing of leaks in conduits, pipes, fittings, syphons/traps and hoses.

PROPERTIES

- Seals, protection and repairs
- 100% watertight
- Self-fusing (instantly self-adhesive)
- Can be used under pressure
- Can be used under water
- Remains elastic
- Easy to apply
- Weather & UV resistant
- Easy to remove
- No adhesive remnants on removal
- Can be corrected in seconds
- Pressure resistant up to 12 bar
- Insulating up to 15,000 volts per layer
